SANODYE® BLUE 2LW

Sanodye Blue 2LW produces attractive bright blue shades. This dye demonstrates light fastness properties that make it also suitable for exterior items.

PROPERTIES:

- Chemical description: Anthraquinone dye (granular)
- Light fastness: Architectural quality (8+)
- Weather fastness: Outstanding
- Heat fastness: Moderate up to 400° F.

RECOMMENDED APPLICATION DETAILS:

- Concentration: 0.5 - 2.0 g/l
- pH range: 5.0 - 6.0
- Buffering: ~1% Ammonium Acetate Liq.
- Temperature: 140° - 160° F.
- Immersion Time: 2 - 20 minutes

For architectural quality finishes, please refer to the processing requirements as described in the Reliant bulletin, the Sanodal System.

PREFERRED SEALING METHODS:

- Hot: Anodal ASL or Anodal AS
- Medium: Anodal MS-1 New or Anodal MTS Plus
- Cold: Anodal CS-2, Anodal CS-2N or Anodal CS3

PRECAUTIONS:

Effective rinsing and normal care to eliminate drag-in are required for best results.

ENVIRONMENTAL CONSIDERATIONS:

This is a RoHS compliant product that contains no heavy metals.
